

World's Strongest & Highest Quality Natural Antioxidant

Natural Astaxanthin

Powerful Antioxidant

King of Carotenoids

Antioxidants are man-made or natural substances that may prevent or delay some types of cell damage. They are the molecules that fight free radicals in our body. Free radicals are compounds that cause harm if their levels become too high in our body.

Are antioxidants helpful for disease prevention? Antioxidants such as vitamins C and E, carotene, lycopene, lutein and many other substances may play a role in helping to prevent diseases such as cancer, cardiovascular diseases. Many basic research studies and observational epidemiologic studies in humans suggest that antioxidants can prevent oxidative damage in that individuals who consume large amounts of fruits and vegetables seem to experience lower rates of diseases caused by oxidative damage.

Astaxanthin is a naturally occurring carotenoid pigment that is found in many types of marine life, animals, fruits, algae, and veggies. It is responsible for the pink-red pigmentation of wild salmon and crustaceans such as shrimp and lobsters. Research reveals that it is 10 to 100 times more potent than beta-carotene and lycopene. Unlike other antioxidants such as vitamin E, C, D, beta-carotene, and selenium, it does not become a pro-oxidant in the body. Haematococcus Pluvialis aquatic algae being its ingredient creates Astaxanthin to protect itself from stressful environmental conditions. It forms powerful DNA repairing active. Astaxanthin is a powerhouse when it comes to eliminating free radicals. It is **6,000 times stronger than vitamin C, 550 times stronger than vitamin E, 800 times stronger than CoQ10 & 500 times stronger than catechins.**

Astaxanthin has an ORAC value of 2822200, making it 293X as potent as wild blueberries a well-known antioxidant-rich food. The unique chemical structure that spans the cell membrane in Astaxanthin gives rise to an exciting and diverse array of health benefits.

Benefits of Astaxanthin

- Reduces oxidative stress
- Helps in anti-aging & cellular health
- Supports heart health
- Helps in skin health & UV protection
- Supports immune system
- Supports in male fertility
- Improves brain health
- Helps in Athletic performance & joint health
- Helps in eye health
- Supports cognitive health

INGREDIENTS

- ✓ Natural Astaxanthin
- ✓ From Haematococcus Pluvialis Microalgae

DOSAGE: 1 Softgel per day or As advised by a medical practitioner

How it works:

Best Supplement Astaxanthin works as a powerful antioxidant and will help as a stress reliever, anti-inflammatory and immune system booster. With its incredible antioxidant properties, our product will prevent certain chronic diseases, reverse skin aging, etc.
