

Healthy Heart & Healthy Joint

OMEGA 3 Gold

With High EPA & DHA

Omega-3 fatty acids, also called ω -3 fatty acids or n-3 fatty acids, are polyunsaturated fatty acids (PUFAs) characterized by the presence of a double bond three atoms away from the terminal methyl group in their chemical structure. As your body cannot produce them on its own, you need to get them from your diet.

Omega-3s play important roles in the body as components of the phospholipids that form the structures of cell membranes. DHA, in particular, is especially high in the retina, brain, and sperm.

Every cell in your body needs Omega-3s, especially the eyes and brain. Omega-3s are also important for muscle activity, immune function, digestion and fertility.

Best supplement Omega-3 gold contains Natural fish oil concentrate, EPA & DHA balance between Pro- and anti-inflammatory proteins. They reduce cardiovascular mortality and improved cardiovascular outcomes.

While EPA supports the heart, immune system and inflammatory responses, DHA focuses on the brain, eyes and central nervous system, and needs repletion for breast-feeding mothers, making DHA uniquely important for pregnant and lactating women.
