SlimTrim

Burn Fat Daily

Increase Metabolism

Best supplement Slim Trim is a fat burner supplement that works by increasing your resting metabolic rate. Your metabolism is all about the chemical process that converts carbohydrates, proteins and fats from your food into the energy that your cells need to function. According to studies, BMR accounts for approximately 70% of your daily energy use.

Slim Trim is the combination of Garcinia Cambogia a fruit-derived supplement taken to boost weight loss. The peel of the fruit contains high amounts of hydroxy citric acid (HCA), which is the active ingredient believed to be responsible for most of its weight loss benefits.

L-carnitine is a substance that helps your body turn fat into energy. While your body produces it in your liver and kidneys, you can also find it in meat, dairy products, nuts, and legumes. Researchers found carnitine supplementation led to 55 percent less muscle glycogen usage, 44 percent lower muscle lactate and other changes that resulted in improved exercise performance.

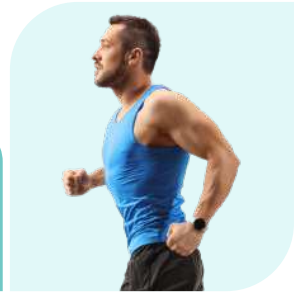

L-carnitine may be helpful for treating a number of conditions, including heart disease, peripheral artery disease, and diabetic neuropathy. L-carnitine per serving can help transport fatty acids from foods to mitochondria and accelerate fat-burning.

The other ingredients like green tea extract, green coffee extract helps burn calories and reduce the fat you absorb from food. It has a rich supply of health-promoting plant compounds.

Benefits of SlimTrim

- Provides better performance in gym
- Increases focus
- Suppress your appetite
- Stabilize Blood sugar
- Release fat stores
- Preserve lean muscle
- Maintains healthy weight
- Help in boost energy
