WnZinc

Bioavailable Monomethionine Zinc

Zinc is a mineral that is essential for many of the body's normal functions and systems, including the immune system, wound healing, blood clotting, thyroid function, and the senses of taste and smell. Zinc is necessary for the activity of over 300 enzymes that aid in metabolism, digestion, nerve function. Approximately 17.3% of the global population does not get enough dietary zinc.

Best Supplement WnZinc is a patent product of L'optiZinc which is a unique mineral chelate that pairs Zinc with the amino acid L-methionine. Research studies show that L-OptiZinc® is better absorbed than other forms of zinc and that plasma levels remain higher compared to other zinc forms.

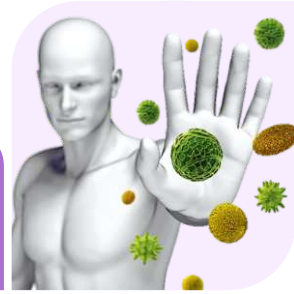

Zinc Monomethionine is a bio-available forms of mineral zinc. It is a chemical compound that is used in the manufacture of many products.

Zinc monomethionines are found naturally in many foods, including meat, fish, eggs, dairy products, nuts, seeds, fruits, vegetables, legumes, grains, beans, lentils, soybeans, rice, wheat, barley, oats, corn, rye, millet, potatoes, sweet potatoes and many others. Zinc Methionine plays a vital role in skin and connective tissues.
